Times are updated through 2019 Summer MCSL Swim Season; only A Meet times are included.

Note: Prior to 1980, times were recorded on analog mechanical stopwatches (except in the All Star Meet). During those years, times were rounded to the next-slower tenth of a second. Thus, for example, a time of 21.31 would have been recorded as 21.4. Since 1980, times in all meets have been recorded on digital stopwatches, to the one-hundredth of a second. Accordingly, any digitally-recorded time that is less than a tenth of a second faster than an analog time is considered to be a tie with the analog time.
